Lesson 11 Time - Part one

**NOTE:** The signs for day, week, month and year (next page) are illustrated as if you are watching someone else sign. However, because the signs for the months (below) are differentiated by what happens behind the hand, these are drawn as if the signer is looking down at his/her own signs. To make these signs, turn your left hand palm inward and use your right hand to make the letter signs. Then move your right hand over the left as if turning the page of a calendar. In some instances, a second letter is made on the other side of the left hand, i.e. once the "imaginary" page is turned.
